

Vaniköy F85 Plus fructose syrup

Label-friendly sugar and calorie reduction

HIGHER RELATIVE SWEETNESS

SUGAR & CALORIE REDUCTION

LABEL-FRIENDLY

Today's consumers want it all. Simpler labels and less processed foods, made with recognizable ingredients are a priority. At the same time, they're seeking foods and beverages with less sugar and lower calories, yet still insist on great-tasting products that live up to their sweet expectations.

Vaniköy F85 Plus fructose syrup can help formulators meet those challenging demands. A 85% pure fructose syrup, it draws its sweetness from the same type of sugar found in most fruits at high levels. Fructose, or fruit sugar as it's often called, is the sweetest of all naturally occurring sugars. As a result, Vaniköy F85 Plus is sweeter than sucrose, enabling formulators to deliver the same sweet taste at lower usage levels, reducing both calories and sugar content.

Label-friendly approach to sugar and calorie reduction:

- **30% sugar & calorie reduction** – 100% sucrose replacement to 70% fructose. Fructose delivers a balanced sweet taste at lower usage levels, enabling claimable sugar and calorie reduction.
- **Natural flavour** – Sugar reduction up to 30% is achievable as it is supported with natural flavour.
- **Label-friendly ingredient** – In its pure form, fructose is often referred to as fruit sugar, and has a neutral consumer perception. No E-code and no-artificial sweetener claims in labeling.
- **Nice, sweet taste** – Fructose delivers a fast and intense sweetness.
- **Ready to use syrup** – Significant cost advantage versus crystalline fructose.

Ideal for food and beverages with fruity taste profiles.

	Characteristics	Functional Benefits
Vaniköy F85 Plus	4 kcal/g (d.s.)	<ul style="list-style-type: none"> • Full-calorie sweetener, providing energy for body and brain
	Label-friendly ingredient	<ul style="list-style-type: none"> • Known as fruit sugar • Neutral consumer perception
